REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: a timely filed Terminal Disclaimer has been approved to overcome the rejection of claims under Double Patenting Rejection. Further, the prior art of record fails to disclose an apparatus comprising elements being configured as recited in claims. Specifically, none of the prior art teaches or fairly suggests the limitation "*a second power supply wire formed on said semiconductor substrate independently of said first power supply wire and connected between said input terminal and said second circuit of each of said plurality of said logic circuits*" as required by independent claims 24 and 31. It is noted that the Examiner interprets the term "independently" to mean that the first power supply wire is formed between the input terminal of the IC device (i.e., pin terminal) and the recited first circuit, and the second power supply wire is also formed between the input terminal and the recited second circuit, and the two wires are not connected to each other on the IC device at any point other than at the input terminal, and thus are "independently" formed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
